Out-of-Pocket  
Limit

**How to read:** This chart shows how much Medicare Supplement plans pay for medical services. For example, Plan A pays 100% of Part A coinsurance and hospital costs (but not the deductible).

- **Plan F and Plan G** offer a high-deductible plan. If you choose this, you must pay the deductible amount (\$2,490 in 2022) before your policy pays anything.
- **Plans C and F** aren't available to people newly eligible for Medicare on or after January 1, 2020.
- **Plan K and Plan L** have out-of-pocket limits of \$6,220 and \$3,110 in 2022. Once you pay that amount and the Part B deductible (\$233 in 2022), your plan pays 100% of covered services for the rest of the year.
- With **Plan N**, you will pay up to \$20 to see your doctor and up to \$50 to go to the emergency room if your visit doesn't result in a hospital admission.
- Medicare **Part A**, plans pay up to an additional 365 days after Medicare benefits are used up.
