INTEGRITY CONNECT

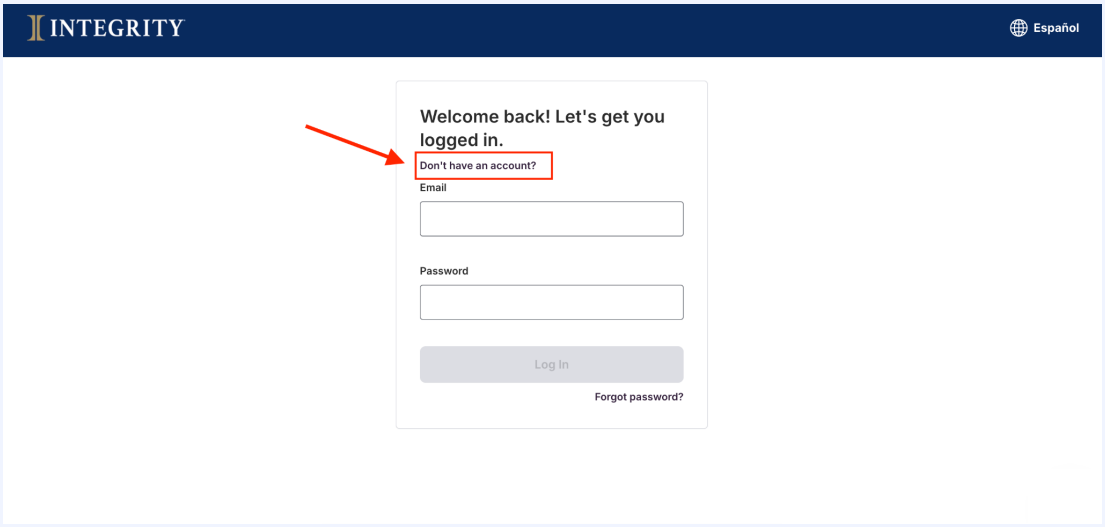

Creating an EDE Account

Stride is powering Integrity's Enhanced Direct Enrollment (EDE) pathway, which gives agents the ability to shop plans, complete Marketplace applications, and manage their applications within the Integrity ecosystem. With EDE, you can help your under 65 clients enroll in Marketplace plans through Healthcare.gov and Georgia Access. Follow the steps below to get started!

Step 1. Create your account
Navigate to https://integrity.stridehealth.com/enrollment/welcome and select "Log in / Create an Account"

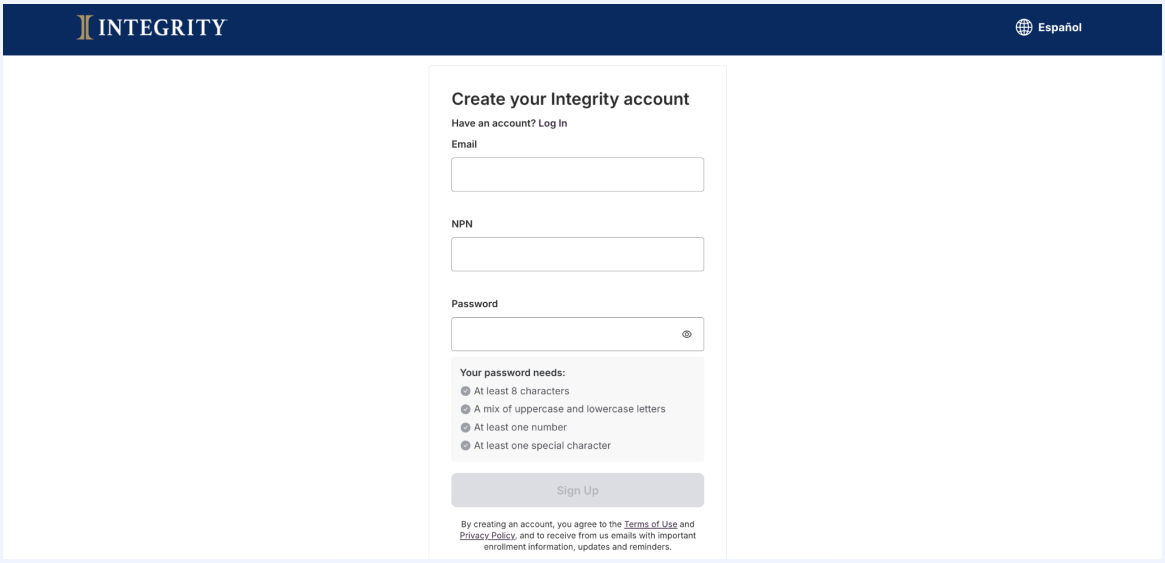

If you are a new user, select "Don't have an account?"

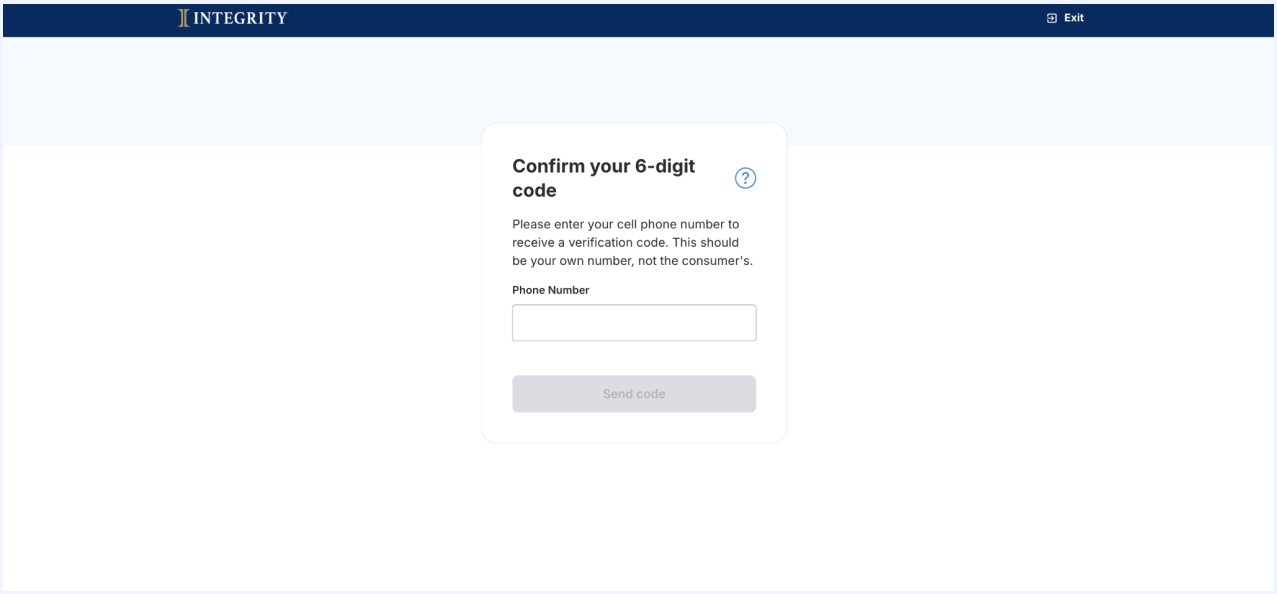

Create your EDE account using:

- Your IntegrityCONNECT email address
- Your individual National Producer Number (NPN)
- A password of your choice per the provided directions

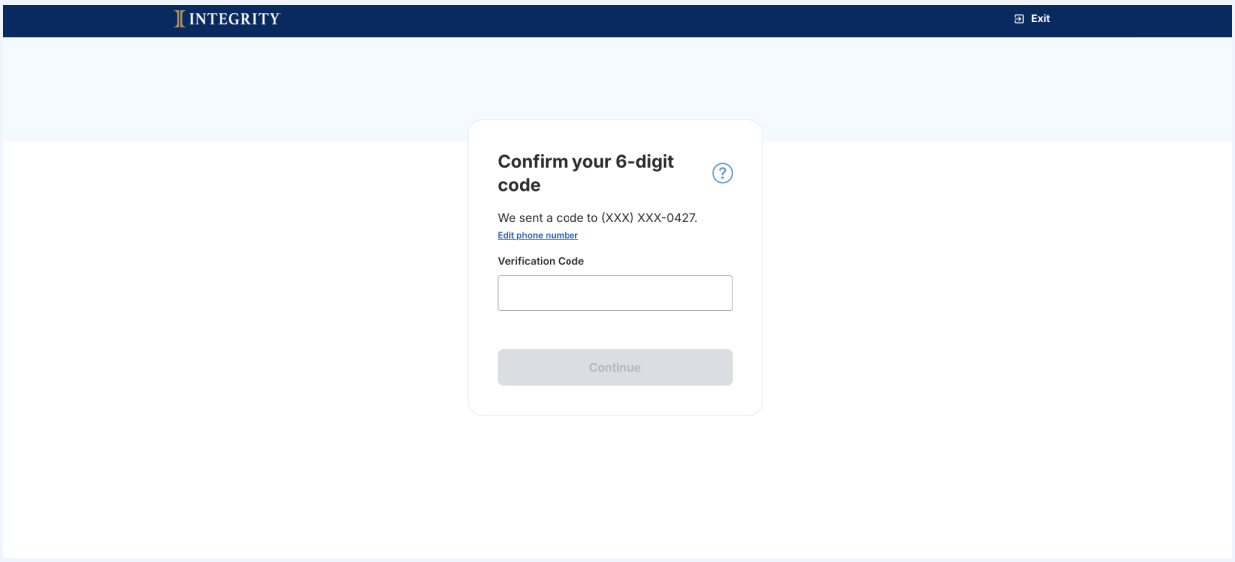

IMPORTANT: Enter your National Producer Number (NPN) carefully and accurately. We will use this NPN to verify your licensure through the National Insurance Producer Registry (NIPR), and it will be submitted on all enrollment applications.

Step 2. Set up two-factor authentication & verify your phone number
Enter the phone number you want to use to receive verification texts, then select “Send Code.” This number will be used for two-factor authentication when you sign in going forward.

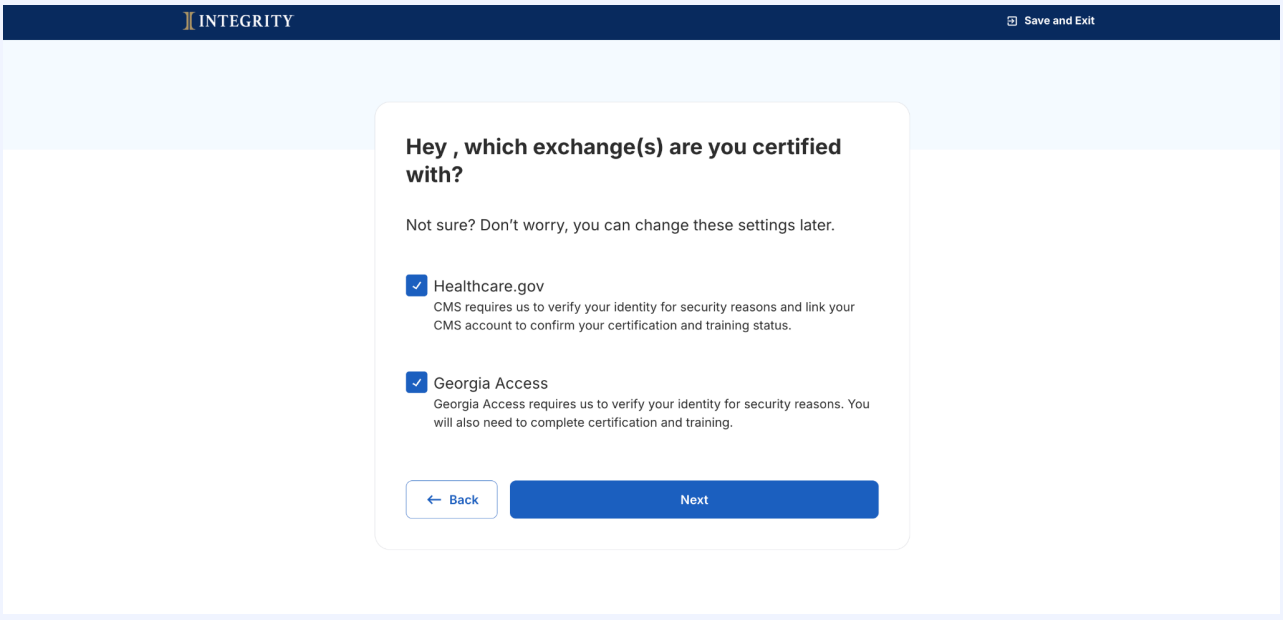

Enter the 6-digit verification code you received by text message, then select “Continue.”

Step 3. Select your certified exchanges

Select the exchanges you are certified with. Your selections will help us guide you through the registration steps required for each exchange.

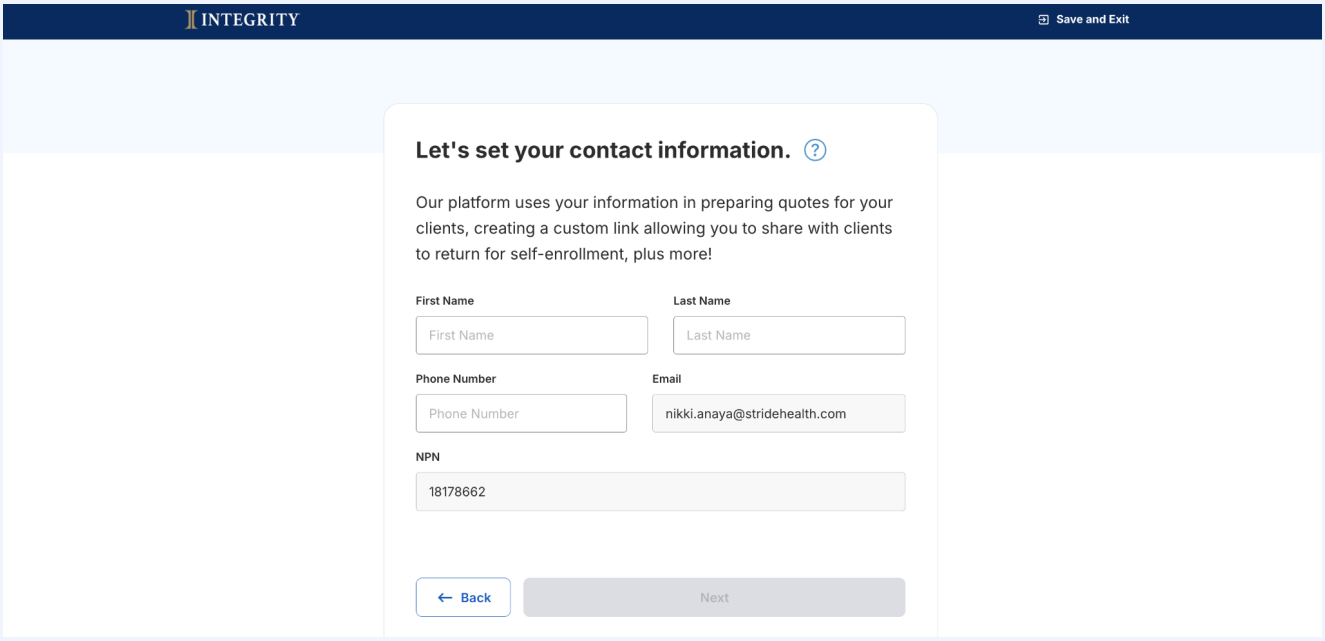

TIP: If you are new to Healthcare.gov and/or Georgia Access and have not yet completed registration and training with the exchanges, we recommend completing these requirements. You can find Healthcare.gov certification requirements here and Georgia Access certification requirements here.

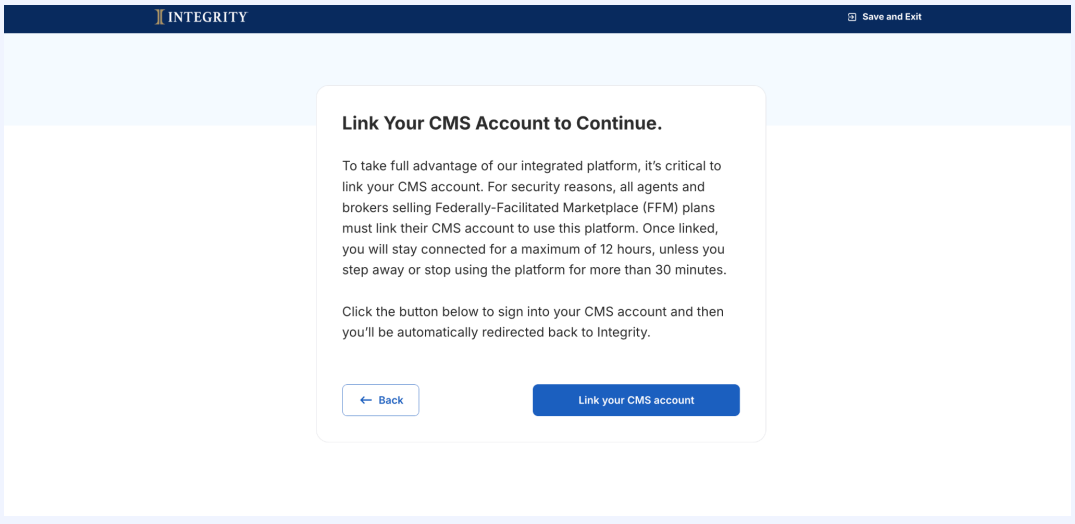

Step 4. Add your contact information
Enter your contact information including:

- First name
- Last name
- Phone number

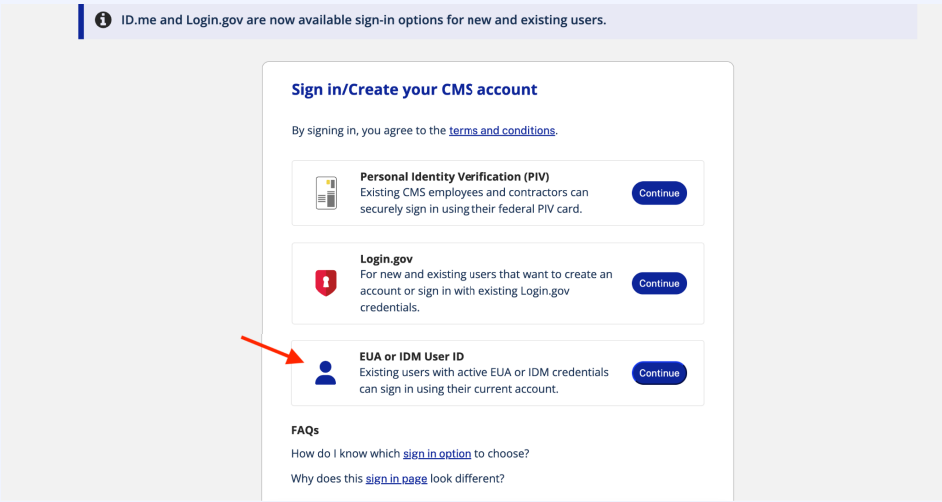

TIP: The phone number entered here does not need to be the same phone number you used for two-factor authentication. We recommend using your Integrity Business Number as your contact phone number. This is the phone number that will be included in Marketplace emails sent to your clients if they have questions.

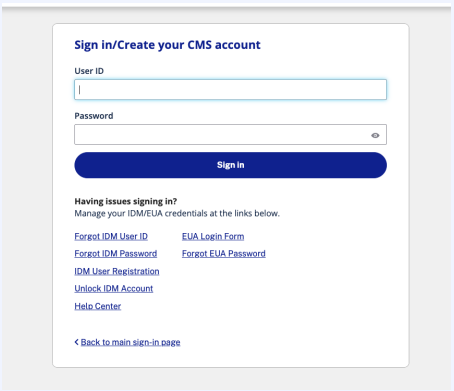

Step 5. Link your CMS account
If you selected Healthcare.gov in step 3, you will be redirected to CMS to link your CMS account.

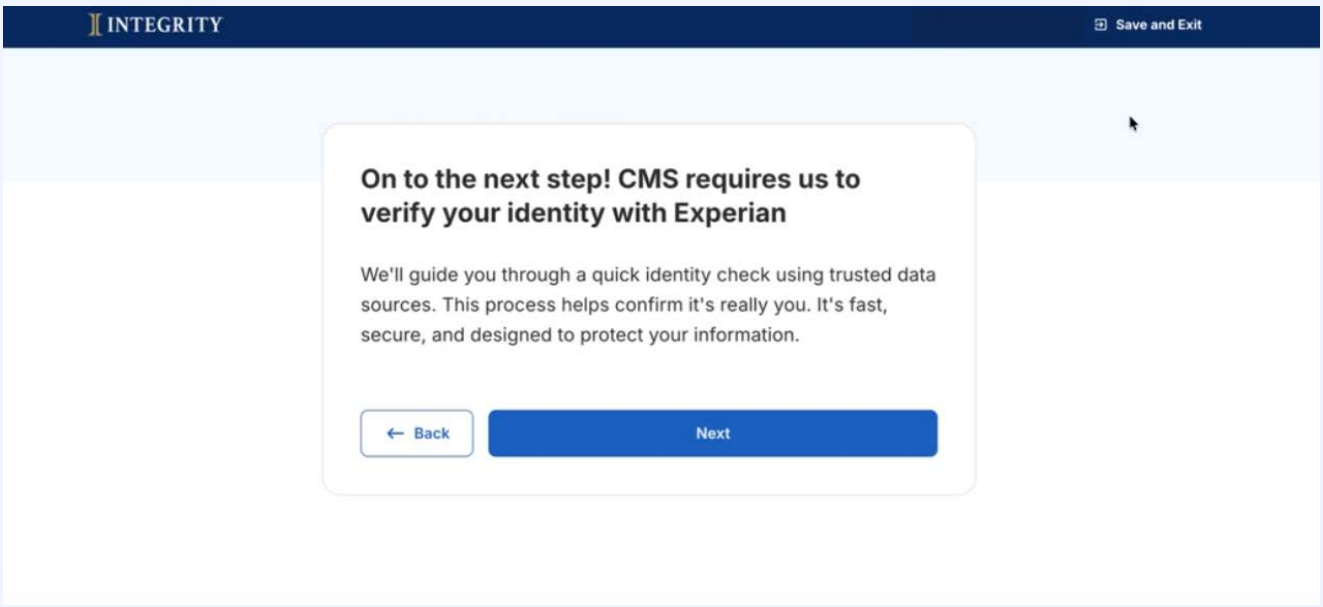

Select EUA/IDM User ID and enter the login credentials you used to complete your Marketplace certification with Healthcare.gov.

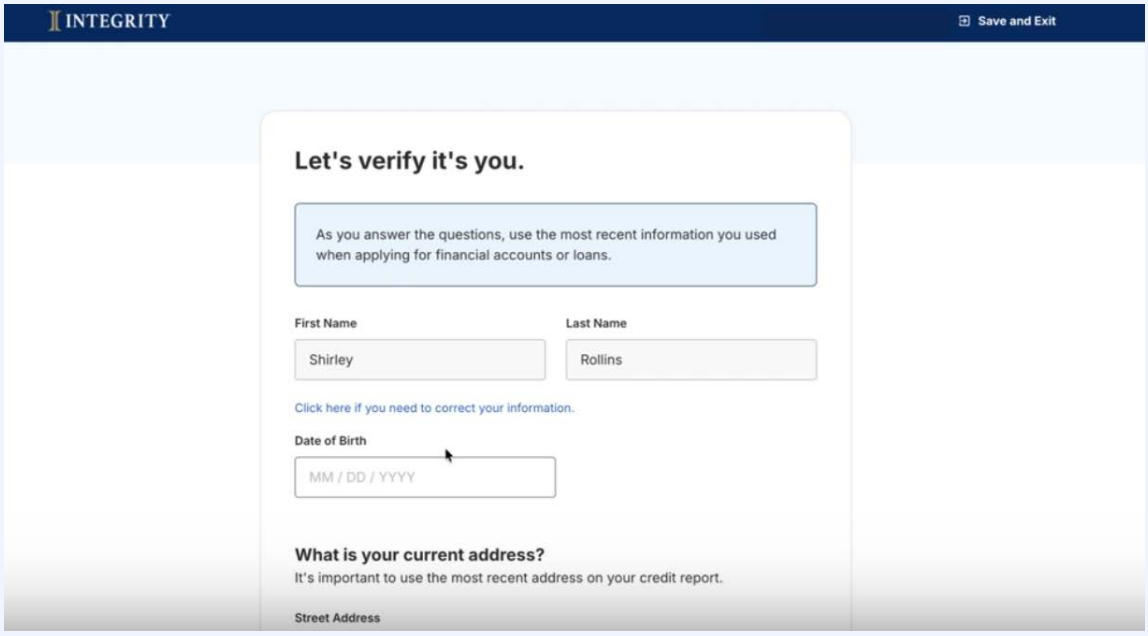

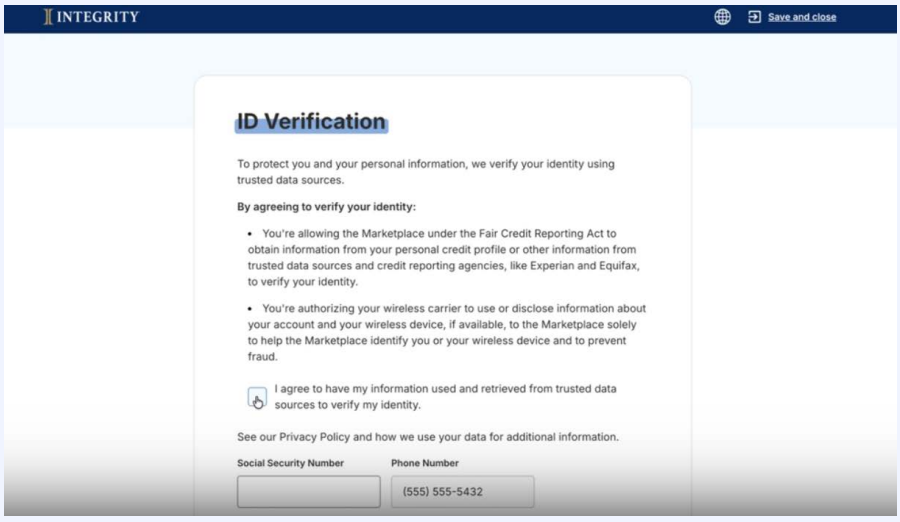

Step 6. Complete identity verification

Next, you'll be asked to complete an identity verification step through Experian. CMS and Georgia Access require agents to verify their identity before using Enhanced Direct Enrollment pathways, like Stride. You generally only need to complete this step once, unless any of your personal information changes.

Enter your date of birth, address, and Social Security Number (SSN). Be sure to enter the information exactly as it appears on your most recent credit report. This helps Experian verify your identity successfully.

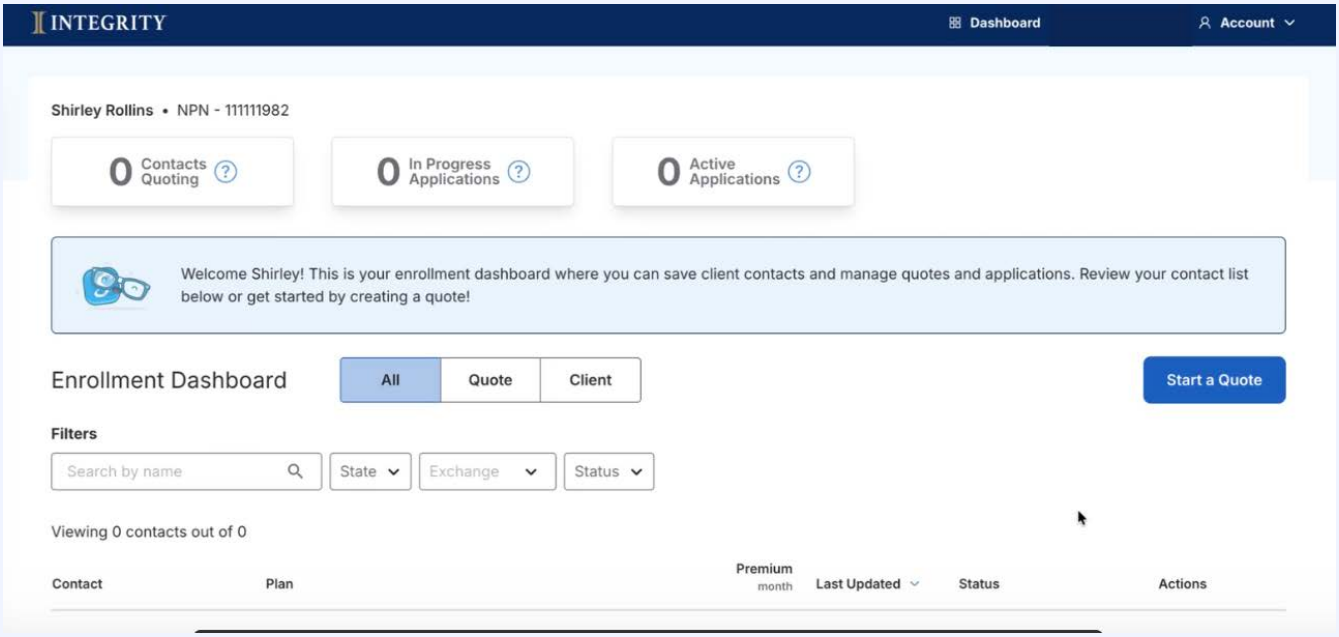

IMPORTANT: If Experian is unable to verify your information, you will see instructions to either call Experian or email Stride to complete manual verification. Follow the instructions provided on your screen to proceed.

Step 7. You're all set!

Once your identity has been successfully verified, you're all set! You'll be taken to your EDE dashboard, where you can start shopping plans and completing Marketplace applications.
